

LITTLE ITEMS OF LOCAL INTEREST

George Hay of Detroit arrived in Carbon Tuesday and is visiting with his brothers, Walter and Len Hay.

Rev. H. Schatz and family of Leduc were dinner guests Wednesday last at the home of Rev. and Mrs. F. Alf.

Betty and Shirley Woods left Monday for Herenton where they will spend a holiday with relatives.

Mr. and Mrs. S.J. Garrett and sons, and Mr. and Mrs. Robt. Barber left Monday on a visit to Kimberley, B.C.

D.E. Charlebois and sons, Eugene and Bert returned last Wednesday from a motor trip to the Peace River country.

Rev. E. Wuerch of Vancouver was a visitor last week with Rev. F. Alf.

Mr. and Mrs. Harry Woods and Gordon Van Winkle of Carbon, and Mr. and Mrs. Dean Twiss of Belesmoot, took in the Stampede in Calgary Monday.

Elaine Torrance is a Calgary visitor this week at the home of Mr. and Mrs. R.J. Fairbairn.

Donnie Hay, of Coreonora is holidaying in Carbon at the home of Mr. and Mrs. S. Torrance.

Mr. and Mrs. C. Olliphant and Gerald and Myrtle Olliphant motored to Calgary on Tuesday.

Mrs. S. N. Wright is visiting with relatives in Calgary this week.

Mrs. C. Pattison underwent an operation for a tumor in a Calgary hospital on Monday.

Mr. and Mrs. Fred Besant and Mr. and Mrs. Len Foxon spent Monday in Calgary.

Jim Smith is driving a special bus from Drumheller to Calgary during Stampede week.

Caroline Wright is again working at the Farmers' Exchange after being absent for four months with a broken ankle.

Last Sunday the Freudenthal people attended the Northern Baptist Convention at Trechu, Alta. Delegates to the convention from Carbon were: C. Dieder, Sr., J. J. Ollhauser, J. Bayer, C. C. Fermann, J. J. Farnch, C. Hensch and Rev. and Mrs. Alf.

Mr. J.M. MacDonald left on Monday for a short vacation.

Mrs. Jas. Smith, who has been visiting at Drumheller and Calgary the past few days, returned to Carbon on Tuesday.

Born, to Mr. and Mrs. Budinski, (nee Bosale Rest) of East Couderay, twin sons on Sunday, July 9, in the Drumheller hospital.

Chas. Pattison returned home Tuesday from Calgary.

Mrs. C. Trumbley, who has been visiting with her sister Mrs. A. Bickley at Bethune, Saskatchewan, returned to Carbon on Monday, coming by way of the northern States.

GOOD PROGRAMME OF SPORTS AT THE GRAND FORKS GROUNDS JULY 5

Rain Hinders Completion of Evening Ball Games

The G.F.A.A. held their annual sports at Grand Forks last Wednesday July 5th. A fair-sized crowd attended, and a good program was run off although rain prevented the final softball game from being played. Rain also forced postponement of the dance which was to have been held in the Garrett school the same evening.

The program for the day included softball, baseball, foot races, horse shoe tournament and a tug-o'-war. The men's softball Hesketh defeated Carbon, Grand Forks defeated East Carbon Flyers and Swallow defeated the Enloe Beavers.

In the second round, Swallow defeated Hesketh and Grand Forks received a bye. The final, to be played in the evening was called off because of rain and Grand Forks and Swallow split the first prize of \$12.

In the two base ball games played Hesketh defeated Three Hills, 4-1 and then took Carbon to canvas by a 5-0 count. The second game was called at the end of the fifth because of rain.

In the tug-o-war contest four teams of nine were entered. The winning team was composed of Sam Garrett, Fred Friebe, Sam Parkens, Sid Wright, Charlie Gwynn, Sid Canning, Hubert Cates, Owen McCracken and Jim Hay.

In the only Girls softball game played, the Carbon team defeated Hesketh. The horse shoe tournament was won by Tom White who took all corners.

Children's races and a pennant scramble were also included in the list of events which took place during the day.

CARBON GIRLS WIN FROM GHOST PINE SATURDAY
The Carbon Girls' Softball team defeated the Ghost Pine Girls on the local diamond Saturday evening by a score of 17-15.

Lineup of Carbon team:
Marjorie Goulde, Katie Abramenko, Lily Kapanick, Marjorie McCracken, Helen Gablehouse, Ellen Trumbley, Mary Ward, Dorothy Watt and Margaret Walsh.

98 DEGREES IN SHADE
Temperatures have been gradually rising since the first of the month and on Sunday the thermometer registered 98 degrees in the shade. While the warm weather is promoting rapid growth it is also a harbinger of hail and farmers who have so far missed this catastrophe are hoping for the best during the next six weeks.

Mr. and Mrs. W. E. Watkins of Champion, and Mr. and Mrs. Watkins of Carbon, returned Tuesday and are visiting at the home of Mr. and Mrs. A.F. McKibbin.

B. A. BUYS 5 LOTS IN CARBON

The British American Oil Company have purchased five lots from the Village of Carbon, the purchasing price being \$20 per lot. This parcel of land is situated on the south side of the highway leading into town, at the rear of Len Hay's residence, and the oil company will put in underground storage tanks to handle their products. It is expected that this will be commenced shortly.

HAILED OUT FARMERS PROTEST LOSS ADJUSTING

A meeting of the hailed-out farmers in the Carbon district was held in the I.O.O.F. hall at Carbon on Saturday afternoon, July 8th, to discuss the manner in which adjustments of losses were being made with regard to insurance on hailed-out crops. About sixty farmers attended and S.N. Wright was elected chairman, with Mr. H. Irwin being appointed secretary.

Mr. Cameron of the Hall Board addressed the meeting and explained the manner in which adjustments were being made, and afterwards answered a number of questions asked by the farmers.

After some further discussion it was decided to adjust the losses until Saturday, July 15th, at the same time and place.

The farmers who were hailed out want an adjustment on their crops immediately, some claiming that they would then be able to summer-fallow the land for next year's crop. Apparently the Hall Board figures are for day for day to adjust the losses.

LITTLE ITEMS OF LOCAL INTEREST
The Carbon Juniors defeated the Rockyford Juniors at the Rockyford sports by a 2-0 score.

Mrs. Frank Emery, who has been visiting with friends in Calgary and Turner Valley, returned to Carbon on Friday. She was accompanied by Miss Pearl Kenny, who will spend a few days in Carbon.

Mrs. Jack McGowan left on Tuesday for Scotland, where she will spend several weeks visiting with her mother and other relatives.

Miss Joyce Laing, who has been teaching school in the Peace River district, is home for the holidays.

Mr. and Mrs. Otto Schickel, Miss Grace Cameron and Mr. J. McCracken are spending the week in Banff.

—FOR SALE OR TRADE—Two good milk cows, 5 and 9 years old. One fresh and the other due to freshen in six weeks. Apply to John McCracken, Carbon, Alta.

Mr. Downey took the C.G.I.T. girls to camp at Millerville on Wednesday. Those from Carbon attending camp are Mrs. C. Olliphant, Marion Torrance Lorraine Downey and Jean Heath.

Miss Margaret Shaw, Joe and Jack Appleyard motored to Calgary Sunday. Joe and Jack returned to Carbon Tuesday night.

THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

"The agricultural scientist has helped farmers to make two blades grow where only one grew before, and has assisted in many ways to increase farm production, but what does the agricultural scientist now intend to do in helping to distribute or to market those products now held as unused surpluses?"

This was part of the address of welcome to Mayor Telford, of Vancouver, to the recent convention of the Canadian Seed Growers' Association and of the Canadian Society of Technical Agriculturalists.

One part of the answer given to His Honor the Mayor was that by increasing production, the scientist had also greatly increased quality and that it was this superior quality contained in Canadian grain and alfalfa, grass, feed root, and garden vegetable seeds that was enabling these crops to be sold in foreign countries in much larger quantities than could be done had the extra quality not been present.

The scientist admitted, however that the sale of the extra quality was still unsold surpluses and that therefore, something else is needed. Now, what this something else is, explained by the agricultural economists, and that important matter will be discussed in a forthcoming article.

DISTRICT NO. 5 TENNIS TOURNAMENT COMPLETED HERE ON SUNDAY, JULY 9

Local Players Finished Well Up in Competition

The District No. 5 Championships of the Alberta Lawn Tennis Association were brought to a successful conclusion on Sunday, July 9th, after having been postponed from July 1st on account of a heavy rain which wrecked the courts at Carbon. The courts have been put in excellent condition and the following are the complete results of the tournament.

MEN'S CHAMPIONSHIP SINGLES
N. McClure, Drumheller, defeated J. W. Giffen, Strathmore, 6-2, 6-4, J. Cumberford, Drumheller, defeated V. Harney, Carbon, 6-0, 6-1. S. Jamieson, Drumheller, defeated H. Longstaff, Carbon, 6-3, 6-5. F. Foxon, Carbon, defeated A. Jamieson, Drumheller, 6-2, 6-4. N.E. Nash, Carbon, won by default from A. Gorn, Swallow, J.C. Spence, Carbon, H. Freeman, Strathmore, and C. Foxon, Carbon, received byes.

Quarter-finals
N. McClure won by default. F. Foxon defeated N.E. Nash, 6-3, 6-5. S. Jamieson defeated J. Cumberford, 6-3, 6-1. H. Freeman defeated C. Foxon, 6-2, 6-5.

Semi-finals
F. Foxon defeated H. Freeman, 6-2, 6-3. S. Jamieson.

WOMEN'S SINGLES
Miss S. Toshack, Drumheller, defeated Miss M. Nash, Carbon, 6-3, 6-4. Miss M. Connelly, Drumheller, won by default from Miss B. Whitehead, Strathmore.

Semi-finals
Miss M. Connelly defeated Miss S. Toshack, Drumheller, 6-1, 6-1. Miss D. Began, Drumheller, Miss E. Torrance, Carbon, Miss S. Toshack, Drumheller, Miss D. Freeman, Strathmore, and Miss I. Lannon, Drumheller received byes.

Finals
Miss D. Began, defeated Miss E. Torrance, 6-0, 6-2. Miss M. Connelly, defeated Miss B. Toshack, 6-2, 6-5. Miss A. Lemay, defeated Miss P. Toshack, 6-1, 6-0. Miss I. Lannon, defeated Miss D. Freeman, 6-2, 6-2.

Finals
Miss M. Connelly defeated Miss D. Began, 6-3, 6-4. Miss I. Lannon, defeated Miss E. Torrance, 6-5, 6-5.

MEN'S DOUBLES
C. Foxon and H.E. Kelly, defeated H. Longstaff and J. Longstaff, 6-5, 1-6, 8-6. N.E. Nash and F. Foxon, defeated C. Foxon and H.E. Kelly, 6-2, 6-0.

Final
N.E. Nash and F. Foxon, Carbon, defeated H. Harney and V. Hawkins, Carbon, 6-0, 6-1.

WOMEN'S DOUBLES
Misses A. Lemay and M. Nash, Carbon, defeated Misses K. Slipp and L. Masterson, Trochu, 6-4, 6-3.

Final
Misses A. Lemay and M. Nash, Carbon, defeated Misses E. Torrance and H. Mathers, Carbon, 6-2, 6-2.

MIXED DOUBLES
H. Longstaff and Miss F. Moss, defeated H.E. Kelly and Miss H. Mathers, 6-2, 6-4. F. Foxon and Miss M. Nash, defeated C. Foxon and Miss E. Torrance, 6-3, 5-6, 6-0.

Quarter-final
F. Foxon and Miss M. Nash, defeated H. Longstaff and Miss F. Moss, 6-0, 6-2. N. Nash and Miss A. Lemay, defeated V. Harney and Miss K. Slipp, 6-1, 6-1.

Final
N.E. Nash and Miss A. Lemay, Carbon, defeated F. Foxon and Miss M. Nash, Carbon, 6-3, 6-2.

MEN'S SECONDARY SINGLES
C. Foxon defeated V. Harney, 6-5, 6-0. N.E. Nash defeated H. Longstaff, 6-2, 6-5.

Final
N.E. Nash, Carbon, defeated C. Foxon, Carbon, 6-1, 6-5.

Women's Secondary Singles
Miss M. Nash, Carbon, defeated Miss E. Torrance, Carbon, 6-2, 6-2.

LONG YEARS AGO

July 12, 1923

Born, to Mr. and Mrs. F. Skerry on July 7, a daughter.

The Carbon Chronical installed a Linotype machine this week and in future the tedious work of setting type by hand will be eliminated.

Tenders have been let for the graveling of the streets of the Village of Carbon.

Hesketh will hold its annual sports day on July 20.

The Drumheller Junior ball team defeated Carbon 4-1 last Wednesday.

The date of the Carbon Fair has been set for September 13.

P.E.R.A. PROVIDES FOR STOCK WATERING DAMS

Farmers in the Carbon district who desire to have dams constructed in creeks, or dug-outs made to hold water should apply immediately to Mr. F.R. Barfield, Water Resource office, Edmonton, where all particulars are available.

Under the Prairie Farm Rehabilitation Act provisions are made whereby a farmer can secure the services of an engineer and funds to put in dams and dug-outs to hold water. All that is required is for the farmer to apply to the proper authorities.

As this Act may be repealed at some future date, farmers should take advantage of the assistance if they need water supply for stock.

CARBON BASEBALL TEAM LOSSES TWICE TO NACMINE

Playing at the local diamond on Sunday, the Carbon Junior team lost both ends of a doubleheader to the Nacmine Juniors by scores of 13-10 and 10-9.

The first game was evenly contested with the Nacmine team scoring most of their runs in the last innings, scoring six runs in one and four in another. Home runs were made by Jim Hunt, Carbon, and Thompson of Nacmine. In the second game, Molyneux pitching for Nacmine held the Carbon team scoreless, while his teammates were scoring ten runs.

Lineup of teams:
Carbon: C. Trumbley, R. Lemay, W. Skerry, V. Hilton, R. Gablehouse, J. Cameron, N. Wheat, H. Barkley, A. Nicholson, C. Gordon, J. Hunt, A. Kapanick and Cliff Gordon.
Nacmine: Ross, Steele, Lett, Molyneux, Thompson, Kutaj, Massie, Moore, Steele and Mulno.

F. FOXON WINS ROUND ROBIN TOURNAMENT OF CARBON CLUB

The "Round Robin" tournament of the Carbon Lawn Tennis Club came to a close on June 28th with F. Foxon being declared the winner. The following was the final standing of the players, and the games won:

F. Foxon, 67, C. Foxon, 56, A. Lemay, 45, M. Nash, 22, E. Torrance, 10, H. Longstaff, 9, W.A. Braisher, 7, N.E. Nash, 3, H. Wilson, 1, D. Williamson, 0, V. Harney, 0.

Const. W.B. Shaw and son Billy, of Brooks were Carbon visitors this week.

John Blough is building a four-roomed addition to his store next to the Carbon Trading Company.

STANDING OF PUPILS IN INTERMEDIATE ROOM
The following is the standing of the Intermediate Room of the Carbon Public School:

Promotion from Grade VII to VIII, in order of merit:
Marie Reid; Betty Woods; Margaret Standfield; Jean H. McNeil; Christine Harding; Loretta Lemay; Gordon Hunt; Eileen Ward; Boilek Solosky; Betty Gablehouse; George Lemay; Mary Minton; Richard Dolphin.

The following pupils have been promoted from grade VIII to IX:
Zena Trumbley; Vernon Alf; Irene Wilson; Isabel Downey; Violet Pattison; Mabel Nash; Cyril Hunt; Lillian Dixon.

J.M. MacDonald, Teacher.

Const. W.B. Shaw and son Billy, of Brooks were Carbon visitors this week.

John Blough is building a four-roomed addition to his store next to the Carbon Trading Company.

SHOW OF FORCE BY BRITAIN IN THE PRESENT CRISIS

London.—Great Britain launched a series of moves to strengthen the British-French front and at the same time remove doubts as to the course it will follow should new efforts be made to change the map of Europe.

These moves included:

1. Introduction of a bill in the House of Commons setting up a fund estimated at \$24,000,000 to promote export of munitions and materials for the defence requirements of such countries as Poland, Roumania, Greece and Turkey.

2. Announcement the cabinet would see a sample of British air power when 52 Royal Air Force planes go to Paris for the Bastille Day exercises.

3. Announcement a number of air force reserves would be called up during the next three or four months as a test mobilization exercise.

The government's export credit scheme is an enlargement of the plan already in operation. At the present time the board of trade has the power to sanction export of credits for \$600,000 for straight commercial transactions and \$10,000,000 for those which must be judged on political consideration rather than commercial merits.

The \$10,000,000 fund was established primarily to meet the needs of munitions and this trade will not be diminished.

In effect the government proposed to increase the \$10,000,000 fund to \$60,000,000 providing \$50,000,000 in new capital for the peace bond allies. The \$10,000,000 does not meet the interest charges. Some of the contracts may run as long as 10 and 15 years and the terms of the legislation provide that the interest shall not be deducted from the capital amount of the fund. In other words the whole amount must be spent on goods.

Board of trade officials estimated the interest may thus add as much as \$10,000,000.

Allocation of the money has not been completed but Poland, Turkey and Roumania will get the largest appropriations in that order, Poland getting perhaps \$20,000,000. Other countries which may get smaller amounts are Greece, Egypt, Iraq, Finland and Sweden. New Zealand will receive a small credit to be used in establishing an aircraft industry.

Germans Leave Italy

Population Of Southern Italy Has Begun Exodus

Berlin.—Exodus of a large section of the German-speaking population of Southern Italy from Italy into Germany has begun and will continue for weeks to come, official circles said.

The 5,000 Tyrolians who have thus far entered Germany are an advanced guard of thousands more who, it is expected, will gradually be absorbed into the Reich and its widens. Reich. Germany has for some time experienced an acute labor shortage.

It was not revealed, however, what proportion of the 150,000 German-speaking natives of the Southern Tyrol will be repatriated.

Pensions For British M.P.'s

Measure Is Presented In House For Creation Of Fund

London.—Prime Minister Chamberlain presented a bill to the House of Commons for creation of a pension fund to aid needy ex-members of the lower house and their widows.

Each member of parliament would pay an annual sum of £12 (\$56) out of his parliamentary salary. In no case would pensions exceed £150 yearly for former members, and £125 to members' widows.

Heavy Gold Reserves

Washington.—The federal reserve board said gold resources of Great Britain and France are 28 times greater than those of Germany and Italy. In a survey of gold stocks and the movements of gold in recent months, the board disclosed the gold reserves of the two democratic powers total about \$2,215,000, 860 compared with \$222,000 held by Italy and Germany.

Arab Terrorists Sentenced

Haifa, Palestine.—A military court sentenced to death seven Arab terrorists who killed four British soldiers and three Jewish sentry policemen patrolling the railway near Haifa, June 2. Five other terrorists were sentenced to life imprisonment.

To Visit Belgium

King George And Queen Elizabeth Will Cross Channel On Oct. 24

London.—King George and Queen Elizabeth, recently returned from Canada and the United States, announced they had accepted an invitation to visit Belgium from October 24 to 27.

A formal palace announcement said the King and Queen had received the invitation with "much satisfaction" and had accepted with "great pleasure".

The visit will be in return for one paid by Leopold, King of the Belgians, to London in November, 1937. The visit to Belgium is expected to demonstrate anew Anglo-Belgian friendship and recall the war ties which bound Britain so closely to the little country lying just across the English Channel.

Formal invitation to visit the Belgian capital was tendered by King Leopold some time ago. According to earlier reports, King George and Queen Elizabeth will arrive in Antwerp, October 24, aboard a British warship and inspect the Liege International Exposition before returning to England.

Holiday Victims

More Than 600 Deaths Reported In U.S. During Fourth Of July Celebration

New York.—More than 600 persons died violently in the U.S. during the four-day Fourth of July holiday, according to the number of casualties during the holiday last year. There were indications that the final toll would be the greatest of recent years.

Paradoxically, it was a safe and sane fourth as far as fireworks were concerned. Only three persons were killed by exploding fireworks, compared with 25 last year. Hundreds were injured.

A nation-wide survey showed that at least 633 were killed, compared with 583 in 1936. Automobile accidents accounted for 281 deaths, 18 drowned and 194 lost their lives in falls, homicides, fires and railroad and airplane wrecks.

The most ironic death was that of Edward Fisher, 21-year-old son of the secretary of the National Safety Council. He was killed when his automobile skidded off a road near Ludington, Michigan. He had been studying to become a safety engineer.

Trade Revival

Armaments Held Responsible For Improved Conditions, Says German Bank

Berlin.—"Gigantic new armaments" were held responsible for economic revival in Europe by the Reichs Kredit Gesellschaft, one of the country's largest banks, in a mid-year analysis of world economy.

This was said to be true of France and Great Britain as well as Germany.

Although the armaments industry is stimulating the world's markets for raw materials, the bank said that nevertheless certain developments were exercising a stunt on the world economy.

It cited international indebtedness, "reasonable regulation of which must be emphasized again and again as an important precondition for world economic operation." Other factors noted were the world credit market and poor distribution of gold with more than 60 per cent in the United States.

The survey said Germany would continue "with increased energy" to foster her barter system of trade.

New Developments

Ontario May Open Legitimate Mines To Provide Work

Toronto.—Controller D. F. J. Conboy announced that the civil northern Ontario development committee will make a special survey in the near future of the advisability of opening development of the large lignite coal deposits near Blacksmith Falls to absorb Toronto's unemployed.

It was further announced the committee, a sub-committee of the civil employment committee, will study the feasibility of encouraging Canadian pottery industries to make use of large untouched clay deposits in northern Ontario.

Bata Visits New York

New York.—Jan Bata, head of the largest shoe manufacturing company in the world, arrived from Czechoslovakia on the French liner Ile de France to visit the New York World's Fair and to inspect the American branch of his company, under construction at Belmont, Md. The Bata group is also planning a plant in Ontario.

Will Not Discuss Conflict

Britain's Talks To Japan Limited To Trivial Matter Only

Tokyo.—A Japanese spokesman reiterated a demand that Great Britain cooperate with Japan, while Sir Robert Craigie, the British ambassador, declared Britain's attitude toward the Sino-Japanese conflict would not be discussed in forthcoming conversations with Tokyo.

Sir Robert indicated the talks would be limited to the Tientsin controversy. Japanese wishes notwithstanding.

Sir Robert expressed moderate optimism about the possible outcome of the arbitration negotiations but he warned "I believe if forceful tactics are attempted a solution will be impossible; they might on the contrary, lead to catastrophe."

Royal Treasures

Canadian Sovereigns Of King And Queen Shown At Fair

Windsor, Eng.—Sovereigns brought back by the King and Queen from Canada were on view at the Royal Exhibition, where they were displayed in a special case.

These latest royal "treasures" have been lent by the King, together with more historic exhibits from Windsor castle, to form part of a special display by the Royal school in the Windsor great park, where the King's employees send their children.

ARRANGE CREDITS FOR PURCHASE OF WAR MATERIALS

London.—The Daily Mail (Independent) said that powers to make trade and defence credits up to \$100,000,000 (\$202,000,000) to boost the war preparations of Poland, Roumania, Turkey and Greece, to whom Great Britain has given guarantees, are to be sought from parliament.

This was decided at a cabinet meeting, the newspaper said.

A Polish financial mission has been in London three weeks to negotiate for the purchase of war materials.

The Daily Express (Ind.) said credits planned for Poland would be better spent in Canada, Newfoundland and Australia for armament factories.

"Soon you will be lending big sums of money to Poland," the newspaper told its readers. "It will not be used for the building of planes and the production of munitions or the digging of trenches. It will go to pay the salaries of officers and men already mobilized."

"Why not send this money to Canada and Australia to build armament factories there? That would provide us with an inexhaustible supply of arms and ammunition. There is no doubt that Poland would be free from air attack."

OLD FRIENDS MEET AGAIN WHEN THEY JOIN THE RESERVES

Hon. T. C. Davis, Attorney-General of Saskatchewan, who has been appointed Judge of the Saskatchewan Court of Appeal.

Kentucky Floods

Authorities Fear A Possible Death List Of 114 Victims

Morhead, Ky.—A possible death list of 114 was feared as authorities counted 33 known dead and named 81 eastern Kentucky mountaineers who were feared to have been buried under a mudslide.

Generation after generation of these people of the hills have built their homes along the banks of these treacherous streams because there is no level land between the mountain peaks.

They have been through floods before, many of them, but old times shook their heads over the big loss of life from the waters that came as high as 15 feet in a short time.

Morhead was the worst hit of the mountain communities flooded. Postmaster W. E. Crutcher said 38 drowned in this area.

Seventy-five miles almost due south of Morhead is a county called "Breathitt" in feudal years had seven known dead. Sheriff W. E. Neaten, who went to the village of Keok, 10 miles west of Jackson, the county seat, said 60 persons were missing.

Emergency Supplies

British Householders Are Urged To Lay In A Week's Rations

London.—British householders have been advised to lay in a week's supply of rations as part of preparedness for any sudden emergency. William Morrison, chancellor of the duchy of Lancaster, said in the House of Commons.

"The government has drawn to the desirability of rations maintaining, and if possible increasing, their stocks of essential food stuffs and to a suggestion that householders should build up reserves," Mr. Morrison said.

These old friends met again when they went to Housatonic Barracks, Ontario, for training. They have drawn their kit from the stores, and are complete even to the familiar tin hats.

Commission Report

Report On Dominion-Province Relations Is Still Uncompleted

Ottawa.—Report of the royal commission on Dominion-province relations has still started its hearings on November, 1937, is still uncompleted, it was learned, and may not be ready until next fall.

Prime Minister Mackenzie King said he was writing to Dr. Joseph Shinn, chairman of the commission, asking for a definite indication of when its report will be ready.

It has been generally expected the commission's report would have some bearing on the general election if one is held this fall, and that it might possibly provide an issue. The intention is to call a conference between the provinces and the Dominion to study the report.

Danzig Protection

Protest Against German Military Activities In Free City

London.—Great Britain, France and Poland, official circles reported, are considering diplomatic action in protest against German military activities in the Free City.

Prime Minister Chamberlain told the House of Commons:

"His Majesty's government will not fail to take any steps which may seem to them necessary and desirable to make their attitude absolutely clear."

This was in reply to a suggestion by Viscount Halifax, Conservative, that some strong gesture be made to remind Germany of Britain's determination to resist any comp against Danzig.

Radio War

U.S. Builds Short Wave Station To Spread Propaganda

Schenectady, N.Y.—United States engineers readied a short wave "big gun" for action against Germany and Italy in the war for control of the American radio waves.

The "Big Bertha," the United States' first 100 kilowatt short wave station, is the brain child of researchers at General Electric Company, a short wave pioneer.

The station will be ready to fire a verbal "news barrage" at Fascist propaganda within two weeks, engineers predicted.

CLASH BETWEEN JAP AND SOVIET FORCES ON BORDER

Shanghai.—Foreigners arriving from Manchukuo said hospitals in Harbin were "filled to overflowing" with Japanese soldiers wounded in fighting with the Mongolian and Manchukuo forces along the border between Manchukuo and Outer Mongolia.

Japanese official sources said Japan suffered "heavy casualties" in fighting between Japanese and Soviet troops in the Mongolian border area. The Japanese army holds and defends Manchukuo.

Soviet Russia has a similar tie with Outer Mongolia's planes and anti-aircraft batteries shot down 45 Japanese planes.

The Mongol-Soviet forces reported they lost nine planes and that 25 tanks and armored cars were destroyed.

There was no report made public in Moscow of such a battle. The Soviet capital has confirmed the dates of some of the previous battles announced by the Japanese, but all Russian announcements have claimed Soviet victories.

Japanese military sources said results of recent Manchukuo-Mongolian border fighting have reinforced Japan's confidence in her ability to defeat Russia. If necessary, they said, they would develop. They said both their ground and air forces were superior to the Russian.

They said, however, Japan had "no intention of expanding the border clashes into a real war as long as the Russians refrain from attacking strategic points."

The Japanese army in Manchukuo shot down 36 enemy planes had been shot down in this border warfare since May 20 in addition to planes destroyed on the ground in a June 27 air raid on the Mongol air base at Yankai. At the time of this raid it was said 98 Soviet or Mongol craft were destroyed.

Moscow.—A Soviet communication said "about 800 Japanese-Manchukuo planes were killed and 45 Japanese planes shot down during heavy fighting the last three days on the border between Manchukuo and Russian-protected Outer Mongolia."

The communication, distributed by a Tass, official news agency, said that Soviet forces lost 160 planes and killed 200 wounded and nine planes.

JAPAN INTENDS TO BUILD A NEW ORDER IN ASIA

Tokyo.—Premier Baron Kiichiro Hirano, marking the second anniversary of the Japan-Chinese war, warned that Great Britain will have to recognize Japan's right to build a "new order in east Asia."

In a statement concerning the commission's report would have some bearing on the general election if one is held this fall, and that it might possibly provide an issue. The intention is to call a conference between the provinces and the Dominion to study the report.

"True settlement of the pending questions will never be reached if the negotiations are not based on a profound understanding of construction by Japan of a new order in east Asia."

As for Great Britain refuses to admit this fundamental point for Japan, there will remain no other course but to suspend the talks."

Japan "must crush any power" that obstructs her program of creating this new order, the premier said.

Great Britain was a particular target of the statements not only because of the present dispute at Tientsin, where Japanese are blockading the British and French consulates, but because of the British policy in China, which Japan has sought to develop into outright assistance to General Chiang Kai-Shek.

"I do not comprehend by Great Britain of Japan's Far Eastern position is, therefore, the sine qua non condition for settlement," said the premier. "The inclusion of Tientsin. Therefore the problems which will be discussed will be limited to Tientsin."

Soviet Claim Victory

Report Retaliate On Regular Japanese Army Units

Moscow.—Soviet officials said Outer Mongolian forces were reported to have gained a great victory over a Japanese force, the enemy in the remote Khalka river border in dispatches published in Moscow newspapers.

The battle was said to have lasted from July 2 to 5, ending in the rout of Japanese regular army units and the forces which had crossed the river into Outer Mongolian territory. Russians said it was the largest battle fought in the conflict which has raged intermittently since May 31.

(Russia and her protectorate, Outer Mongolia, had held the border most east of the Khalka, which flows north into Lake Baikal. Japan and her ally, Manchukuo, insist the river is the real border.)

Amplifying a Soviet communication estimating Japanese-Manchukuo losses at 100 killed and 100 wounded, the Moscow press described a victory in which tanks, aeroplanes, artillery and infantry forces were engaged.

The Moscow press version of the battle said the Mongolian artillery put 50 Japanese tanks out of commission and silenced eight guns, while Mongol-Soviet planes and anti-aircraft batteries shot down 45 Japanese planes.

The Mongol-Soviet forces reported they lost nine planes and that 25 tanks and armored cars were destroyed.

A Fast Trip

Chicago.—Manufacturer James McVittie had a shave in Lisbon, Portugal, and didn't need another one until he got back home to Chicago. He had breakfast in Lisbon Monday, lunch in Chicago Tuesday. It was one by means of the trans-Atlantic flying boat, Dixie Clipper, and a land plane from New York.

India Favors British Connection

Montreal.—The Congress Party of India, which for years campaigned for home rule, definitely favors India's continued membership in the British Commonwealth of Nations. Dr. D. D. Pannik, general secretary of the party and former private secretary to Mahatma Gandhi, here.

Study Criminal Investigation

Vancouver.—A note of interest, unnamed officers of the British Columbia police started to school at the court house studying criminal investigation under Staff Sergeant C. K. Macdonald, the criminal investigation department of Victoria.

Plan Day Service

Ottawa.—Transport Minister C. D. Howe said it was planned to start Trans-Canada Air Lines day service between Montreal, Toronto and Toronto via Ottawa, July 15.

Livestock Exports

How Canadian Livestock Can Catch And Hold British Market

H. S. Arkell, Canada's former livestock commissioner, in his first paper presented to the annual convention of the Western Stock Growers' Association here, stressed the importance of providing a regular, dependable volume of livestock exports to the United Kingdom.

While Canadian cattlemen have favored enthusiastically to the widest of United States market provided by the new trade treaty, Mr. Arkell warns that the British market must not be neglected or regarded merely as a convenient source for disposal of surplusage. Mr. Arkell has just completed a survey of market policies for agricultural products, as a special assignment for the federal department of agriculture, and he knows where he speaks.

Warning the London market, he points out that Canadian beef is sold to a special selective demand it sold at a premium. Beef of this type has been shipped consistently to the London market for the past year under the direction of the Federal Agriculture Department.

Danger of relying entirely on the United States market is obvious. It is a market that depends on quota limitations and the ruling of governments. It is not inconceivable that a change of government in the United States might wipe out a considerable part of the market for Canadian cattle in that country when present treaties expire.

Mr. Arkell would advise that, merely advising shipment to the United Kingdom. He advocated increased livestock production, so that an assured source of supply could be available for steady, consistent exports.

Further, he advised that, in order to assure a steady export of cattle to satisfy the British demand, and at the same time to avoid inevitable loss through price fluctuations, the cattlemen themselves should contribute to a fund to pay any loss on export. This policy, which might be the first great step in a constructive rational program of marketing livestock, has operated successfully in other countries, he said. Calgary, Alberta.

Trick Question

One Time That The Mother Knows More Than The Doctors

From John Hopkins Medical School comes a plaintive note about a question in an examination which had some of our best medical students badly flummoxed. The question stated that a worried mother consulted her child's doctor about her little one's health, listing a long and complicated series of symptoms. Students were asked to consider the symptoms carefully and make a diagnosis.

A student I was told about did not make much headway in the diagnosis, symptoms, but finally had to give it up as a bad job. When he went home he described the question to his mother, and asked which might be the thought was wrong with the child.

"If you ask me," the mother said, "I would say that the child was nothing much wrong with the child, but that that mother had a terrible case of nerves."

And that, it turned out, was the correct answer—Baltimore Sun.

Discovery Was Important

British Chemist Solved Problem For Allies During World War

The leader of the Jews in Palestine, Dr. Chaim Weizmann, is a distinguished chemist, Russian by birth, who was formerly a professor at Manchester University. Early in the war, while he was still employed there, he made a discovery of the greatest importance to the Allies, states News of the World.

The Ministry of Munitions were extremely concerned over the shortage of acetone, an essential ingredient in cordite, which in those days was made from wood. The timber used for this purpose had to be imported from America, and the quantity needed was so large that we could not afford the necessary tonnage.

Dr. Weizmann solved the problem by obtaining the acetone from maize and other low-cost chemicals.

Food Catalysts

Thomas J. Watson, of New York, retiring president of the International Chamber of Commerce, declared "we must not have another war for it will mean the destruction of civilization as we understand it today."

A slogan that a child can propel by walking on a treadmill has been invented by a Philadelphia man.

Alpine pilots are tested for physical fitness every 90 days in Austria.

Cruelty To Animals

Some People Selfishly Abandon Their Pets During Vacation Time

An annually recurring evil is the callous and selfish abandoning of domestic pets to their own resources while their owners are enjoying themselves away from home. Dogs, for which a great show of affection is made at other times of the year, are in some cases turned loose for the period of the vacation, to live or starve till the return of their careless masters. Cats would fare even worse. If they were not, perhaps, more resourceful in picking up a lean living than the canines. Sometimes it is the caged bird which is left to chirp out its neglected little life in solitude. Yet these heartless persons call themselves "animal lovers" and can become painfully sentimental on the subject of "dumb, defenceless creatures". If these poor little animals could but speak, what an indictment they might bring against their so-called protectors!

There is a tendency to excuse such cruel practices on the ground of thoughtlessness; but that is surely altogether too lenient a view to take. To pack up and go off without a quail, leaving "pets" to their pitiful fate whenever it is inconvenient to provide for them, is a thing, though less, but deliberate. It is not sufficiently known that it is an indictable offence, under the Criminal Code of Canada, Chapter 26, section 512, of which exacts as follows:

"Every one is guilty of an offence and liable, on summary conviction before two justices, to a penalty not exceeding fifty dollars, or to three months imprisonment, with or without hard labor, or to both, who (a) wantonly, cruelly or unnecessarily kills, binds, ill-treats, abuses, over-works, tortures or abandons in distress or, having actual possession or control thereof, in any way fails to provide for the supply of food, water and shelter for any cat, poultry, dog, domestic animal or bird, or wild animal or bird in captivity, so that such animal, suffering or injury is caused to the same."

The penalty is surely severe enough to make possible effective enforcement. However dear they may be to apostles to humane consideration—Hamilton Spectator.

Would Be Handy

But Officials Have Not Approved Zippers For Army Puttees

Zippers may be handy for putting on puttees but neither King's regulations nor the War Office manuals which prescribe what the well-dressed soldier should wear makes any provision for them. Defence department officials were mildly interested in the report from Vernon, B.C., that an inventive officer of the British Columbia regiment of the Duke of Connaught's Own Rifles had conceived the idea of putting zippers on puttees. But they don't think that zippers would be handy in an army issue.

And there's the problem whether a soldier who zippers his puttees is to be considered a properly dressed soldier. An honest-to-goodness puttee should be rolled in regular spirals round the lower leg. A concession is made for military hose, but helmets who like to fold the puttee in the centre of the shin bone, giving it a criss-cross effect. But that is rightly restricted to three folds. More than that is actually frowned upon and considerable effort is put forward to stamp out any tendency to fold the puttee, say, four times.

Spanish Loyalists

Have Found For Refugees Under Agreement With Mexican Government

Juan Negrin, former premier of loyalist Spain, said he would leave immediately for Paris and arrange for the departure of "several thousand" loyalist refugees for a haven in Mexico. He said that he had met with the Mexican government.

Negrin said arrangements for the admittance of the Spanish war refugees were made with Lázaro Cárdenas, president of Mexico. The former premier and the Spaniards there are more than 60,000 of them in France who fled across the border in the closing days of the Spanish war, would be settled in the 200-mile valley that lies between Puerto Penasco on the Pacific and Santa Ana, Sonora. Plans for a railroad between these two points, opening up the rich mining area, have been approved by the transportation officials in the government.

Inheriting a fortune, a poor man in Dublin was supplied that his income tax was larger than his previous yearly income, and he has become more miserly than ever before.

Muscles of the lobster are tested for selection, which is outside its body.

A HAPPY PICTURE OF THE ROYAL FAMILY AT THEIR RE-UNION

The Princesses Elizabeth and Margaret Rose had just finished greeting their royal parents when this picture was taken. They do not have to ask if the girls were glad to see Mother and Father back home from Canada.

Canadian Poultry In Demand

Great Britain Wants More Poultry Shipments From Canada

"There has been a notable improvement in the packing and grading of Canadian poultry reaching the British market in the past two to three years, and the only complaint is that we are not getting enough of it," said Stephen Siratky, one of the largest buyers of poultry on the Smithfield Market, London, England, who visited Ottawa recently.

"One of the principal reasons for my visit to Canada is to try and find out why we cannot get more Canadian poultry," continued Mr. Siratky. "There is a market for fully four times as much as the Dominion has been sending recently, providing it is within the three pound to five pound weights, which are most in demand by British consumers. Poultry from Canada as from other parts of the Empire, has the advantage of a six per cent. per pound premium entering the United Kingdom."

"Canadian poultry dealers and producers should fully appreciate the importance of uniform grading and packing and every detail linked with sales appearance or appeal. In poultry, like other food products is really bought with the eyes. The Canadian poultry we are getting is satisfactory as to quality, but we want more of it."

Written By Children

"Children's Voices," a book of verse written by children for children, was issued at the National Education Association convention in San Francisco. The authors and illustrators are pupils in San Francisco elementary schools. Writings are in their original form.

Germany's first large plant for producing synthetic rubber, at Schönewalde, is expected to produce about 27,500 tons of the product this year.

Says Victim Was Poisoned

Reference Is Made To Assassinations That Led To The Great War

The conviction that Princess Sophie, whose assassination with Archduke Franz Ferdinand 25 years ago led to the Great War, was poisoned "to make sure of her death," was voiced by Dr. Leo Pfeffer, the examining magistrate.

Dr. Pfeffer discussed for the first time the details of his investigation of the tragedy. Now old and deaf and nearly blind, Dr. Pfeffer said his investigations at the time convinced him that Princess Sophie could have been saved "except for carelessness and an injection, which must have been some kind of poison."

"I was fully convinced at the time that the two deaths came in view of the Austro-Hungarian monarchy, which wanted to start action against Serbia," he said.

A month after the killings, Austria-Hungary declared war on Serbia, charging that the Serbian government was behind the plot. Soon all Europe entered the conflict which spread over the world.

Dr. Pfeffer said he demanded an autopsy be performed on the princess to satisfy his suspicion but it was refused by "higher-ups."

Dr. Pfeffer, poisoned by many years, worked in his garden and his model orchard. Despite his great age, he refuses to give up, he is energetic.

Submarine Is Rummaged

The United States submarine seal was rummaged by the small French coastal steamship *Troulès* as it left the Galien locks on the Panama Canal. Neither ship suffered serious damage, and both proceeded to Baltimore.

In future a physician starting practice in Cuba must have been a citizen at least 10 years.

Taking Up New Work

English Girl Gives Up Nice Job To Become Policewoman

Tall, dark-haired Mary Smith, Sheffield girl, who never forgets a face, is giving up a comfortable job in her home town to become a policeman in London.

Miss Smith, attractive 21-year-old receptionist in a big hotel, realizes that her new job will be "tough" after the comforts of her hotel life.

"I have never been frightened of anything," she declared. "I would tackle a fight if necessary. I suppose I shall have to learn the art of self-defence at the police college."

"Some of my friends scoff at the idea of my joining the police force but I have made up my mind. I want to get on, and I shall work hard."

Miss Smith, an excellent linguist, has done many jobs. She taught children at her home in New Mills, Derbyshire, but decided that teaching was not her forte. Then she worked for the ministry of labor in Salford, Lancashire, for 12 months.

She next entered the hotel business. In England and Germany she has tried nearly every hotel job for a girl. She has been chambermaid, laundress, hairdresser's assistant, housekeeper, and receptionist.

"It's been a good life," she said, "but I am looking forward to my new job now keenly than I did any in the past."

Does Not Double Nuclei

Two identical whistles sounded, neither don't make a note twice as loud as one, but a combined sound will, thus three decibels louder than one whistle. Thus if each whistle makes a 50 decibel sound, the two together will give a sound only 52 decibels.

Natural color is used in a much greater percentage of amateur movies than in professional films.

Wheat Crop Pests

Common Rootrot Of Wheat Factor In Reducing Yields

Wheat crops in Western Canada are liable to serious injuries from a variety of causes which have been classed roughly as climatic factors and pests, climatic factors include drought, hail, wind and frosts. Pests include weeds, insects, fungi and bacteria. Many causes of loss are of local importance in most years but reach epidemic proportions at times, e.g., rust, drought and grasshoppers. Many pests, however, are present at all times for the more or less injury all times. The latter class of pests include the fungi which cause common rootrot of cereals.

Common rootrot of wheat is one of the more obscure troubles, as it is present on the underground parts of the plant. It is none the less real and is an important factor tending to reduce yields. Some affected plants may be killed before or soon after emergence from the soil, or between heading and maturity. Other plants may be stunted in the seedling stage and retarded in development, with some reduction in tillering and a lowered yield of grain. In a badly diseased seed, weeds may be established due to the thin stand of stunted plants, and prevent their recovery by using up the soil moisture reserve.

Evidence has been gained from investigations conducted at the Dominion Laboratory of Plant Pathology at Saskatoon that a limited water supply intensifies the injury caused by rootrot. It is before the soil and that high soil moisture favours partial or complete recovery of plants from early effects of the disease, and retards its development, with some reduction in tillering and a lowered yield of grain. In a badly diseased seed, weeds may be established due to the thin stand of stunted plants, and prevent their recovery by using up the soil moisture reserve.

It has also been shown that early and shallow weeding are usually good practices in reducing common rootrot. It is also shown that early weeding will result in slow emergence and a thin stand. Two inches is about an optimum depth, being usually sufficiently deep to reach ample moisture for germination, yet shallow enough to need to penetrate and for seedlings to emerge to the best advantage. Deep seeding results in a long vertical internode between the crown where the crown roots arise and the seed where the seminal roots arise. This long internode is much more liable to rot than infection than is a short internode.

Enquiries regarding rootrots of cereals, together with specimens of diseased plants may be sent to the nearest Dominion Laboratory of Plant Pathology. In the Prairie Provinces, these are located at Winnipeg, Saskatoon and Edmonton.

Only The Beginning

Medical Science Looks For Increasing Success In Beating Backward

One by one medical science has beaten these terrors backward. Leprosy, smallpox, bubonic plague, under whose epidemic attacks the Occidental world reeled periodically and which lurked everywhere as endemic, have now practically disappeared and it is one of the few things to the credit of the West in its intercourse with the Orient that the crowded millions of the East are gradually being safeguarded from the attacks of these immortal foes of all humanity.

And so it goes on. Medical science has not yet found its equivalent for the "philosopher's stone," nor will it be, for even when pain and sickness, with their accompaniment of sorrow and sighing, will fly away, there will still be the ache of the cruel burden of it is one of the greatest accomplishments of humanity. And what has been achieved is nothing but the beginning of the "professional" and guarded moments — only the beginning of what is to come—Montreal Star.

True Education

The test of true education is not whether the graduates are millionaires or ditch diggers. Even if they were ditch diggers, they would still be educated citizens and not the racy demerits if they had sound character, a disciplined mind and an elevated spirit. These things true education can give. On these things democracy depends.

CANADIAN MAKES SOLO FLIGHT AFTER ONE DAY'S INSTRUCTION

Bacon Cole, 26, of Ottawa, left, joined the Ottawa Flying Club at 7 a.m., and took to the air with the club instructor, William Nason. After five hours and 15 minutes' dual instruction during the day, Cole satisfied the instructor that he was capable of flying solo, and he completed his solo flight at 7 p.m. Cole thus established a Canadian record, if not a world's record, for such a performance.

The lights at Shute Park (Philadelphia) for night baseball have sufficient candor to illuminate a highway for 429 miles.

**RAINS SLOW UP ROAD
WORK IN ALBERTA**

Heavy rainfall in many rural sections of Alberta, while beneficial to crop conditions, may have the effect of making it impossible to complete this year's main highway surfacing program.

Officials of the Alberta Motor Association have been informed by the provincial public works department that the bituminous surfacing program has been delayed a month all ready owing to rainfall, which has made it impossible to proceed with the work at the rate necessary to complete the program this year. This delay has been due to the Jasper Highway, west of Edmonton, where only six of the 21 mile program of "blotting" has been finished. Operations also have been slowed up on bituminous surfacing of the main highway between Calgary and Colesfield and south of Calgary on the highway to Waterton.

Despite weather conditions progress is being made on grading and travelling operations, though this work also has been slowed up in various parts of the province.

Given fine weather, it is expected that July will see a start in road building operations in all parts of the province.

Have you been on a trip? Have you friends from out of town visiting you? Do you know of anything happening or of any unusual event that others would enjoy reading about? The Carbon Chronicle wants the news of the town and district and would appreciate your interest and assistance.

Preacher, to adult Sunday school pupil: "What's the name of the bones in your hand?"
Pupil: "Dice, sir."

Commercial Printing
Do not try to economize on necessary expenses. Neatly printed business stationery is just as important to your business as any other of your necessary expenses, and it is poor economy to do without it. Blank writing paper and forms on which your name is written in ink do not raise the prestige of your business. And if it's economy that you want, see us and find that our new prices are most reasonable.

**BANK OF MONTREAL
REGULAR CROP REPORT**

General—Moisture conditions are satisfactory over practically all the main growing area of the Prairie Provinces, and recent warm weather is hastening growth. Early sown wheat is heading out in many sections of Manitoba and in the south and central areas of Saskatchewan. Over the rest of the Prairie Provinces the wheat crop is generally in the shot blade. Grasshoppers are numerous throughout Saskatchewan but damage is slight. Hail storms have occurred in the three Prairie Provinces and some damage is reported in local areas. In Quebec timely rains have improved moisture conditions but growth has been retarded by cool weather. Haying has begun with prospects of a fairly good crop. In Ontario crop prospects generally continue favorable with growth stimulated by timely rains and recent warm weather. Haying is general, with prospects of a fair yield. The strawberry crop has been heavy and other small fruits produce normal yields. In the Maritime Provinces the season is still backward and warm weather is needed. Moisture conditions have improved. In British Columbia, while some fine weather was experienced for several days, a return of rain has had a retarding effect and crops throughout the lower mainland are in urgent need of sunshine.

ALBERTA—Crop prospects generally continue the best in years, with ample moisture, except in the Peace River district and a small area northwest of Edmonton, where good rains are needed. Wheat is mostly in the shot blade. The continuation of the warmer weather at present prevailing would ensure rapid growth; however, growth has been retarded somewhat by cooler weather. There has been some hail damage in the central areas. Pastureage is excellent. Sugar beets are promising.

"What are we having for dinner?"
Sponge cake, dear. I sponged the eggs from Mrs. Holmes; the flour from Mrs. Brown and the milk from Mrs. Smith."

Snicklefritz—
"What made you borrow my best socks?"
Roommate: "I don't know—I must have been wolf gathering."

"Is your wife economical?"
"Oh, very! I do without nearly everything I need."

"Yes, it was a case of love at first sight."
"Why didn't you marry him?"
"I saw him several times afterward."

A cure has been found for hay fever. It is a serum extracted from ducks. Another quick remedy no doubt.

A Long Dog
There was a dachshund once so long. You haven't any notion how long it took him to notify His tail of his emotion! And so it happened when his eyes Were wet with weep and sadness His tail would still be wagging on Because of previous gladness!

Little Diplomat
Billy returned from the garden with a very dirty face.
Mother: "Auntie won't kiss you with a face like that!"
Billy: "That's what I thought mother."

Angler (describing a catch): "The trout was this long—I tell you I never saw such a fish."
Listener: "No, I don't suppose you ever did."

Bridgroom: "I specially went out and bought some hay leaves for the pot roast. Why didn't you use them?"
Bride: "Well, wouldn't I look silly wearing hay leaves just because my pot roast was a success?"

MacLeod Teacher: "Take four out of five, and what have you?"
Tommy: "Typhoid, Miss."

INCOME TAX ALLOWANCES
SAVE OILMEN \$200,000

CALGARY—Annual saving of more than \$100,000 to Alberta's oil industry was predicted in local oil circles as word was received from Ottawa that federal income tax allowances would be granted for pre-production, depreciation and depletion costs.

The amended regulations as outlined by Revenue Minister J.L. Hillyard, will apply to income tax returns by Alberta oil companies on last year's income.

SPECIAL INTRODUCTORY SALE OF RUBBER TRACTOR TIRES

In order to introduce our Tractor Tires quickly into every district of the Prairie Provinces, SPECIAL DISCOUNTS WILL BE GIVEN to the first three purchasers of full sets of these tires, for whatever tractor required, in each of the districts served by the local newspapers carrying this advertisement.

The tires offered are the SUPER POWER GRIP line, having giant knobs on the tread, giving double ordinary traction—forward, backward or sideways—and manufactured by Montgomery Ward and Co., of Chicago, for whom this Company is exclusive distributor in the Prairie Provinces. These tires are FIRST CLASS QUALITY (none better are made), and at LOWEST PRICES. Further, 10% discount will be given to the first purchaser, 10% discount to the second purchaser, and 5% discount to the third purchaser in each district, from our Regular Low Prices, during this Sale.

Descriptive catalogue with prices and full information, showing how your steel wheels can be cut down in our shops and fitted with rims and tires, at a great saving to you, will be mailed the same day as inquiry is received from you.

Their Majesties Accept Hikers' Badges

As a souvenirs of their hike to the summit of Tunnel Mountain during their visit to Banff, Their Majesties, King George and Queen Elizabeth have both graciously accepted the silver insignia of the Sky Line Trail Hikers of the Canadian Rockies. King George has been accompanied by his son, Prince George, and his daughter, Princess Margaret, who were also accompanied by the Sky Line Trail Hikers which he used for his mountaineering adventure and at the suggestion of Dan McCowan, President of this organization, the Parks Branch of the Canadian Government has been asked to erect a cairn on the top of Tunnel Mountain to be named after King George, and also to erect a lookout at a point known as the green spot on Honey Squaw Mountain to be called Queen Elizabeth's View, as Her Majesty was particularly delighted with the panorama of the Canadian Rockies at Banff from that point.

The Sky Line Trail Hikers is active in promoting hiking expeditions through the trails of the National Parks in the Canadian Rockies, and holds an annual four day camp which will be located next August 4-7 in Fairman Valley, north of Lake Louise. Sir Edward Healey, G.B.E., K.C., M.L.A., is the honorary president and the secretary and founder is J. Murray Gibson of Montreal.
